

# INOCare X'TRA

INOCare X'tra is a special product for the removal of solvent inks, and is ideally suited for the deep-cleaning of ceramic and chrome anilox rollers for the gravure, offset and flexographic printing. INOCare X'tra solves fresh and dried solvent-based inks and varnishes.

## APPLICATION AREA

- Cleaning of anilox rollers

## TEMPERATURE RANGE

- 5°C to 50°C

## MIXING RATIO

- Use undiluted

## COLOR

- Colorless

## PH VALUE

- Neutral

## MARKING

- Labeling according to INOCare material safety data sheet

## CHEMICAL BASIS

- Glycol ether

## CONTAINER SIZES

- 1 liter
- 10 liter
- 30 liter

## APPLICATION

Spray undiluted onto the surface to be treated, and let it soak for a few seconds. Then use a cloth and perform circular movements with light pressure on the surface to be cleaned (wear gloves). Rinse off the product with sufficient water. Repeat the process for stubborn soiling or heavily dried inks.

Stand: 05/2016
